2013 Secondary Semiconductor Equipment Market Trends in Asia

Category: Electronics & Semiconductors P&M News

The size of the secondary equipment market is estimated to be greater than \$30 billion.

May 7, 2013 - Today the Semiconductor industry market is divided. Firstly we have advancements in wafer size and a focus on next generation product and secondly, a focus on cost reduction in mature technologies which is leading to an increased demand of secondary equipment in the LED, PVI(PV/ThinFilm) and MEMS manufacturing markets.

SurplusGLOBAL, Inc. the leader in the secondary semiconductor equipment market, participated in the SEMICON Singapore 2013.

SurplusGLOBAL, Inc. has advanced to become a leading global Secondary Semiconductor Equipment leader with a proven track record and comprehensive sales, honesty and integrity. SurplusGLOBAL locates, sells and stocks thousands of systems annually and has established an extensive global network of end users, resellers and contractors. SurplusGLOBAL maintains the semiconductor manufacturing equipment acquired from the leading chip manufacturers in the United States, Europe and Asia covering Fab, AT&T and P&C/SMT capital equipment segments.

Today, SurplusGLOBAL sells more than 200 tools satisfying the demands of the secondary semiconductor equipment market. These are stored in a 245,000 sq. meter warehouse space which is both temperature and humidity controlled. Their customer portfolio includes the majority of the leading 50 global semiconductor companies, which is supported by their international teams of marketing specialists. These specialists are located in the United States, Korea, China and Taiwan. In addition, you will find SurplusGLOBAL participating in all of the Semicon expospace including: Semicon West, Semicon Japan, Semicon Korea, Semicon China, Taiwan, Singapore, Europe and Russia.
