

Company Profile

SurplusGLOBAL

#1 in Pre-owned Equipment Solutions

➤ **Successfully provided over 15,000 equipment since 2000!**

Establishment

March 28, 2000

CEO

Bruce Kim

Colleagues

60 (30+ Sales force)

Inventory

1,500 Tools

Facilities

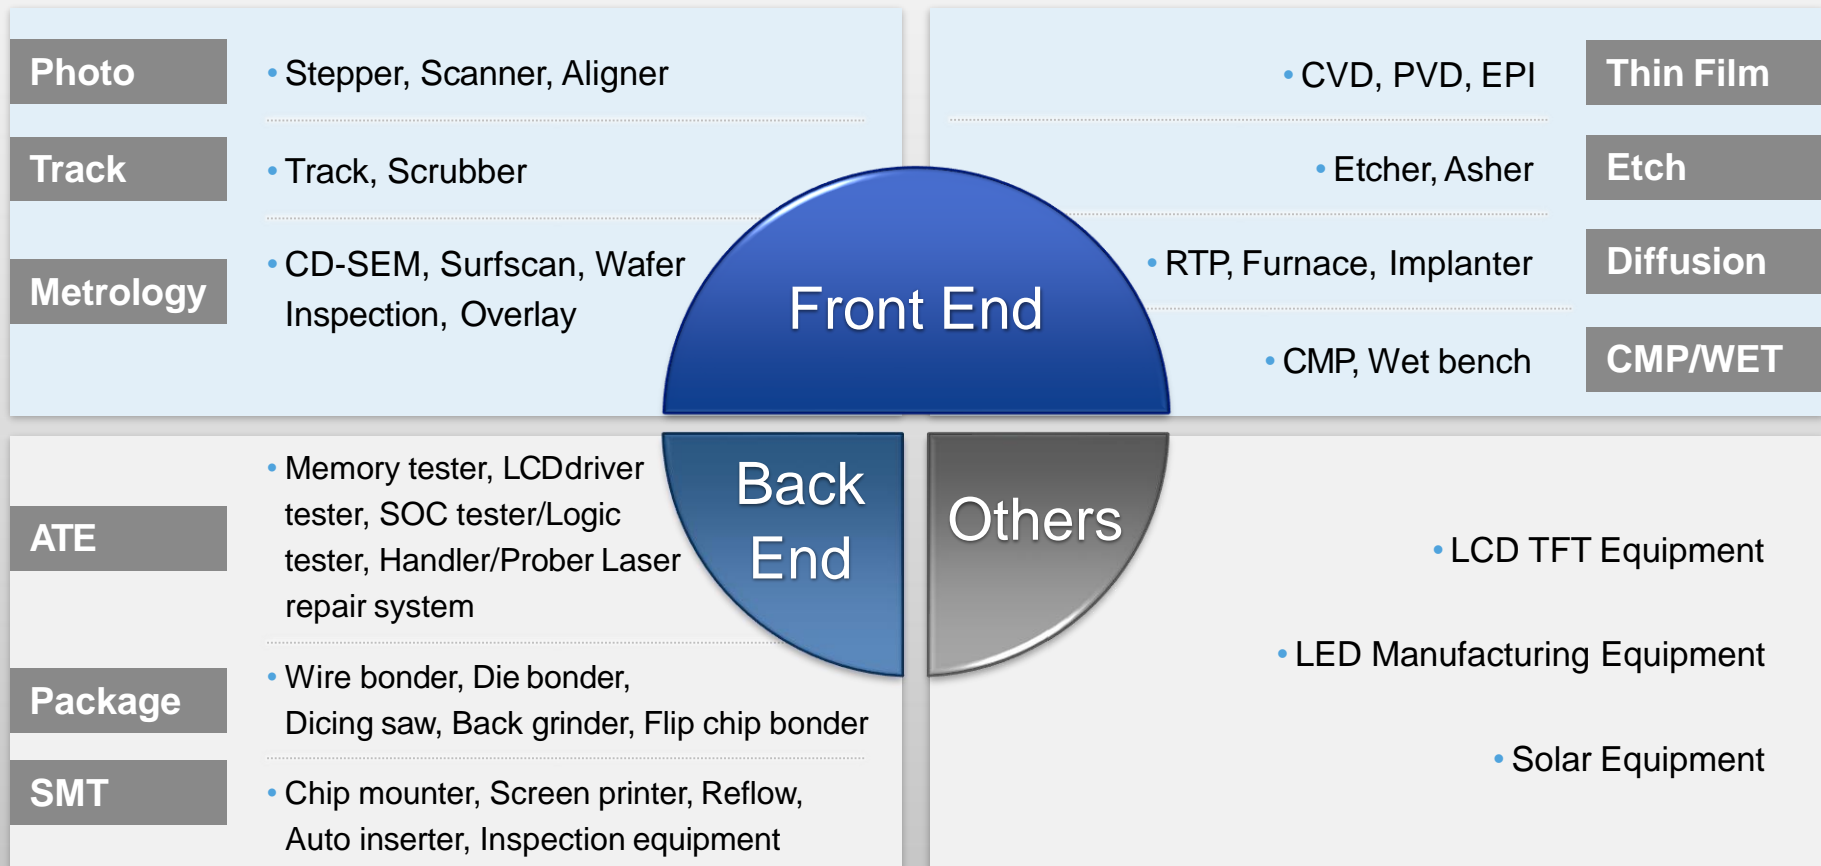

25,000 M² * Air-controlled space and Clean room

Business Scope

Secondary Equipment Trading,
Refurbishment and Reconfiguration,
Remarketing, Valuation, Rental

Online Marketplace

www.SurplusGLOBAL.com

Equipment Sales

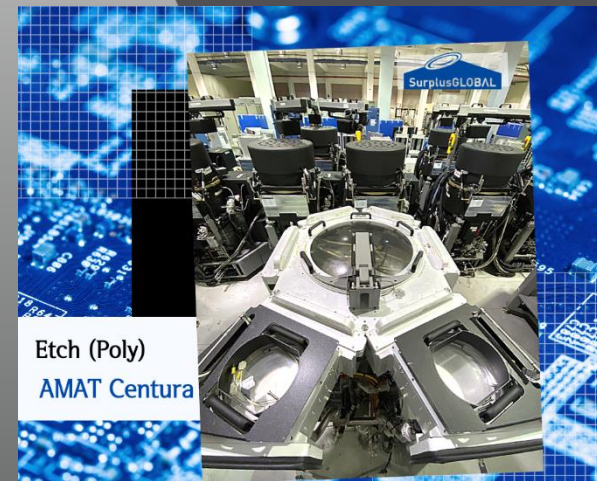

- As is where is Sales
- Turn-key Purchase
- Power on Demonstration
- Remarketing
- Global Sourcing Service
- Logistics Service

Technical Service

- Reconfiguration
- Refurbishment

Others

- Equipment Valuation
- Rental

Etch (Poly)
AMAT Centura

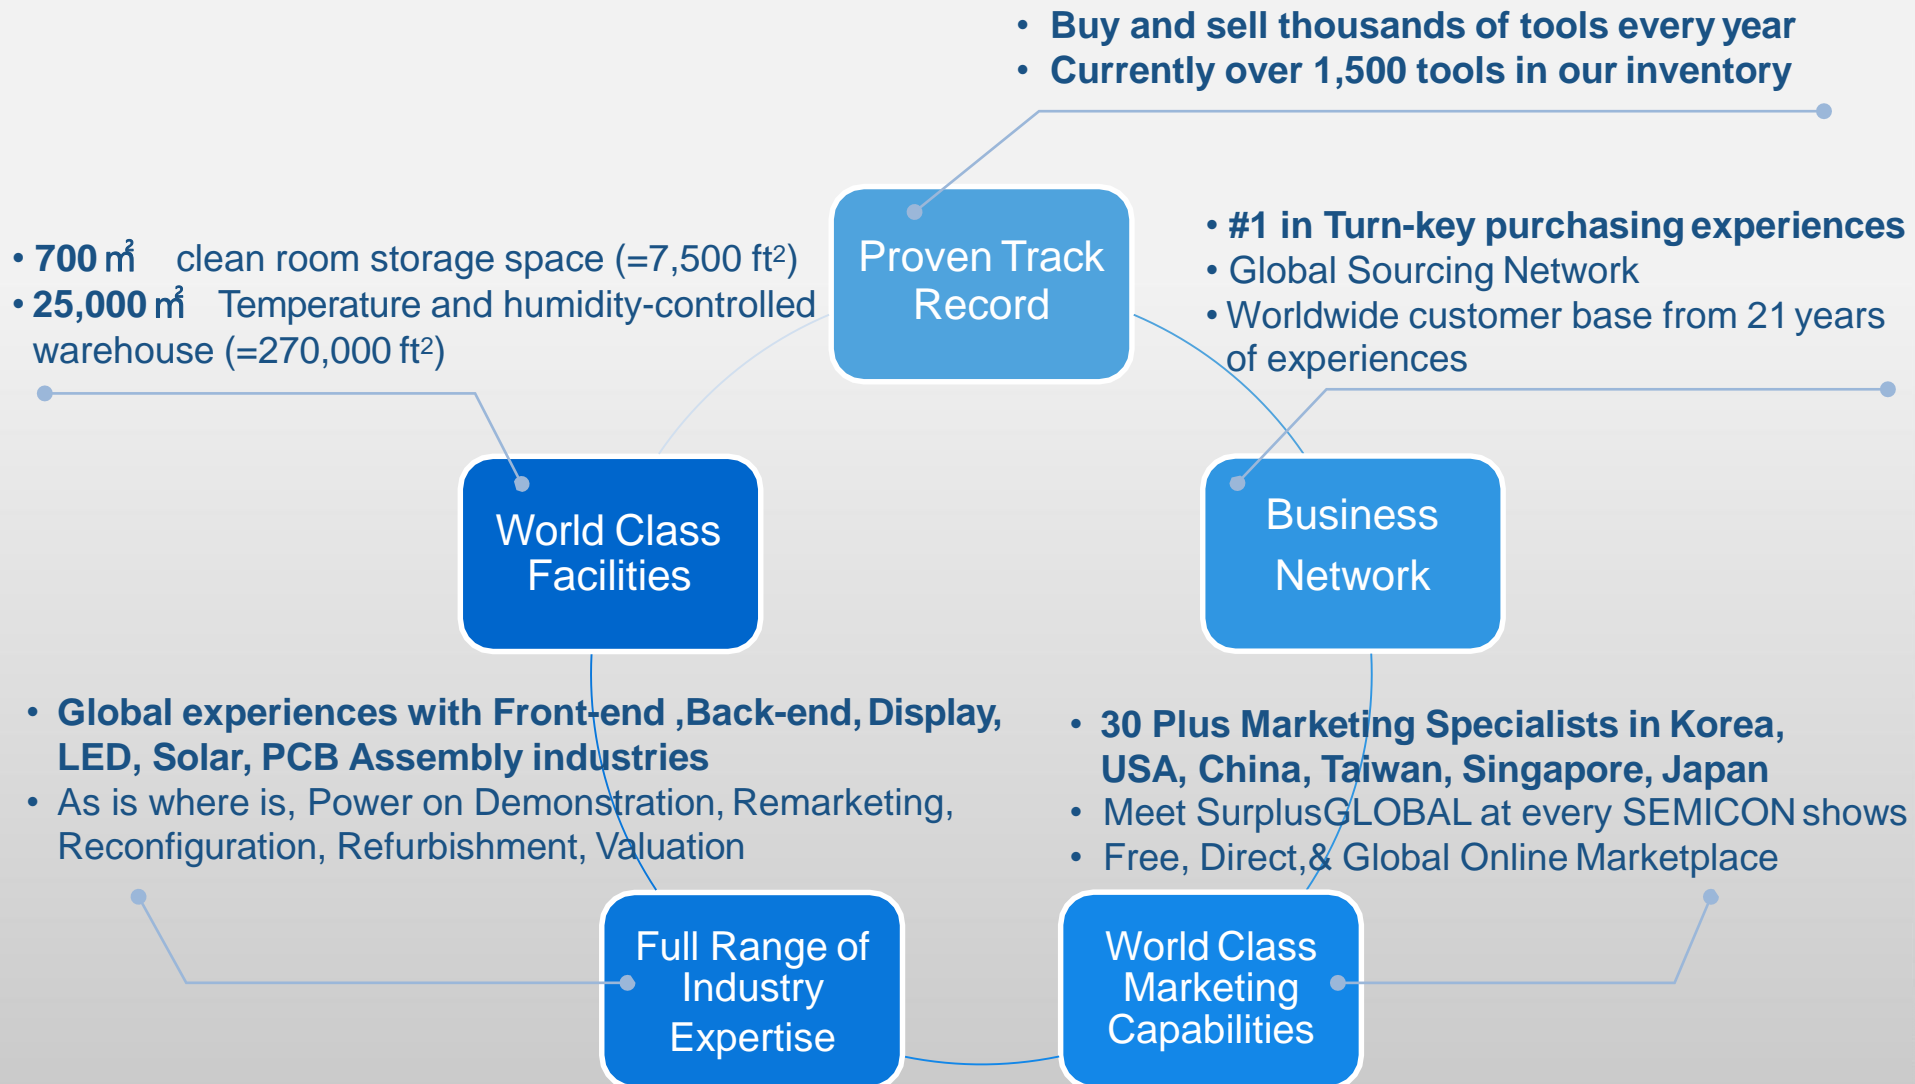

SurplusGLOBAL Remarketing
300mm Leading Edge Tools

from  **GLOBALFOUNDRIES**

- Maximize the Value of Assets
- Minimize the Workload for the Seller
- Transparent Procedures
- 60,000 Potential Customers Worldwide
- World Class Online Marketing
- #1 Proven Track Record with Top 50 Semiconductor FABs
- 30+ experts with extensive network and in-depth knowledge
- Quick Cash Return
- Global Export & Logistics Support

Why SurplusGLOBAL?

➤ Proven Track Record with Global Top Tier Companies!

Service Differentiation

End to End Service

- Equipment Acquisition & Sales : As Is where Is, Power On Demo.
- Technical Service : Reconfiguration, Refurbishment

Total Solution

- Full coverage of Front End, Back End, Display, LED
- Business Network, Global Marketing capability, Best in Class Facility

Global Operations in USA, China, Taiwan, Singapore and Japan

2013 Semiconductor Equipment Market Trends in Asia

May 2013

Category: Electronics & Semiconductor / Other Pkts

Topic: Fabrication, Semiconductor industry

The size of the semiconductor market is estimated to be greater than \$30 billion

The Asian semiconductor market is experiencing continued growth

May 2013 - Today the Semiconductor industry market is dynamic. Firms are now focusing on innovation and a focus on next generation product and technology, a focus on cost reduction in mature technologies which is to be replaced by the demand of secondary industry on the LED, PV (Photovoltaic) and MEMS manufacturing markets.

2013 semiconductor equipment addresses both environmental and cost concerns within the industry. The semiconductor equipment market is expected to continue to grow over the next three years. In 2012 the market size was estimated to be around 30 billion US dollars, with 200mw wafer equipment capturing 60% of the market. In 2013, demand of 300mm wafer equipment is expected to capture an increased share of the market.

Growth in demand both distribution and services are becoming more critical every year. The number of fab facilities in the United States and Europe continue to experience declines, while in Asia there has been continued investment in the China, Taiwan and Korea markets. The semiconductor market accounts for approximately 65% of the semiconductor equipment market. The Asian semiconductor equipment market has a long and growing demand of secondary, financially stable industries such as Integrated Circuit, and are well positioned to lead the supply of this equipment.

Kruc Inc, CEO of SurplusGLOBAL, has participated as Semicon 2013 speaker for the past 7 years and states, "We have been part of the growth of Asian Electronics and Semiconductors market for the past 7 years and we have both supplied and procured many global countries such as South East Asia, South East Asia, Taiwan. To date the demand has grown by both 200mm fab and back end tools, the project started from 300mm fab in Singapore such as Globalfoundries, UMC, Siltronic Tech and SMIT. Global foundries' recent purchase of Promos tools will stimulate the 300mm semiconductor equipment market this year and we see 200mm fab continuing expansion of their capacities at the 2nd half of this year. SurplusGLOBAL continued global growth plans in this region may see the formation of an additional facility in Singapore, adding to the demand for semiconductor equipment."

SurplusGLOBAL, Inc., the leader in the semiconductor equipment market, participated in the SEMICON Singapore 2013.

Since its foundation in 2007, SurplusGLOBAL, Inc. has advanced to become a leading global Semiconductor equipment supplier. SurplusGLOBAL has been recognized and unrecognized awards, Industry and Integrity, SurplusGLOBAL, located, sales and stocks thousands of systems annually and has established an extensive global network of vendors, manufacturers and brokers. SurplusGLOBAL is the largest semiconductor manufacturing equipment dealer from the leading chip manufacturers in the United States, Europe and Asia covering Fab, ATE and PCB/PCBII capital equipment systems.

Today, SurplusGLOBAL has more than 200,000 sq. ft. of semiconductor equipment. SurplusGLOBAL's equipment ranges are valued at 250,000 to \$2.5 million and encompasses a wide range of both temperature and humidity controlled. Their customer portfolio includes the majority of the leading 50 global semiconductor manufacturers and suppliers. SurplusGLOBAL's equipment is sold worldwide. These specialists are located in the United States, Korea, China and Taiwan. Surplus, you will find SurplusGLOBAL in Singapore, Taiwan, Hong Kong, China, India, Japan, South Korea, Vietnam, Japan, America, Seneca Korea, Semicon China, Taiwan, Singapore, Korea and Russia.

➤ Family Support for Children with Developmental Disabilities

➤ SurplusGLOBAL donates a part of the earnings

- Creating various contents related to developmental disability for awareness improvement, Translation of multinational videos and materials.
- Operation Adult Day care Center (Maeum TalkTalk Center)
- Host the 'SmileTogether' Concert
- Family Education and Emotional Support
- Support for the Social Integration

- Hosted 1st Autism Expo (July 12-13th, 2019)
- Providing various information on raising and education and related services required for autism and developmental delay, as well as providing roadmap for future challenges and plans
- Provide Integrated information about autistic disorders and developmental delay according to each theme
- Use as a channel to redefine misconceptions and prejudices about autistic disorders
- Opportunities for better programs and services through the exchange of new treatments and trends
- Marketing opportunities through their families and the associated employees

We provide the optimized equipment solutions

If you have any questions or inquiries, please don't hesitate to contact us. Sales@SurplusGLOBAL.com
